

desktop/mobile app

options

electron

- 简简单单 web dev 简单
- **front end** chromium 简单 webview
- **back end** NodeJS
- NPM package
- **size explosion** 简单 package 简单giga bytes
- **init** clone template project

tauri

- 简简单单 **bundle size**
- **front end** OS 简单 webview
- **back end** rust
- **rust plugins**
- **init**

```
npx create tauri-app
```

Neutralino.js

简单 tauri 简单rust

Electrobun

very early stages. only on arm mac.

Cons

简简单单 chromium based 简单 server 简单

The only issue I had was when the OS sleeps. The front-end is disconnected from Neutralino's server, forcing you to handle this by reloading the app when the computer wakes up.
It apparently happened on Electron and Tauri too. Some blamed it on Chromium.

简简单单 简单 vscode 简单
