

[react] re-render

1. state changes

1. 触发 re-render

2. 1-纯component2-pure-component(memoization)props

re-rendercontextpure-co impotentcontextprops

const GreetUser = React.memo() => {

const user = React.useContext(UserContext);

// ...

});

// more-or-less equivalent to

const GreetUser = React.memo(({ user }) => {

// ...

}
